

Letting my daughter study in Delia MR was actually a good choice to begin with, since she was new to Hong Kong and was not that familiar with the local environment or the education curriculum. However, the teachers and students in this school are very kind and welcome her with open arms, and when in difficulties they would help her in many ways. Also, this school provides good opportunities to let her explore more and join different outdoor activities. And now my daughter got comfortable with the school and the students here. I would like to express gratitude to the school and the caring and kind-hearted teachers who have offered a lot of help to my daughter to be able to settle well in this new city and learning environment.
